

Advisory, Custom Product Development, and Installation

WHAT'S IN IT FOR YOU?

“Our passion for our business in the hospitality and design industry has fine-tuned custom fabrication, speed of construction and delivery with truly the best quality construction known in the industry.”

Alex Marc, ECLECTIC® Contract's founder and owner.

We encourage each designer or developer to make prototypes and samples to assure products and finishes are felt and visualized prior to the production. The best and most reliable way to build these are based on real life prototypes and materials.

We know from experience that product results are always much less reliable when custom made products are based on copy/paste photos, and lower grade materials. ECLECTIC® always strives for unique and original products for each project.

ECLECTIC® focuses on three areas of Exceptional Customer Experience & Results

01

Design Development & Product Sampling

ECLECTIC® maintains customer satisfaction with true service, efficiency, detailed design drawings and approval processes, and installation coordination and assistance. We believe that helping our clients from start to finish is the guaranteed key to executing the best projects for top quality execution and we always install with our most effective process.

02

Experienced Product Design Deliver and Wearability

ECLECTIC® has completed 223 large sized projects over the last 20 years. Our company has built a solid reputation in the hospitality furnishings industry for quality, ingenuity, fair pricing, and quality installation and repair standards. We have been noted as an industry leader in quality finishes, construction and innovative seating & millwork solutions.

03

Excellence in Custom Product Development

ECLECTIC® Custom Is something very unique! For we develop each custom product from the requested idea and concept through technical solutions, prototypes, complete manufacturing, delivery, and installation. As an example: Seat, and back, and pitch are studied and sampled prior to production. This and many more positions dictate the perfect chair and define the comfort seating we deliver.

In order to give you all exact details ahead of the project, we require:

Detailed cad files of custom design or design sessions with ECLECTIC® to explain desired product direction.

- Quantities and installation time frame.
- Orders require a deposit between 50-70 percent of order costs. (Samples must be paid in full prior to construction, development.)
- Actual samples of all COM & COL upholstery materials to confirm yardage .
- Lead time starts once when we are in possession of all delivered materials by site, designer, architect.
- Production schematic drawings require final confirmation before we start making final production drawings or hourly rates for additional production drawings are applied.

Advantages

Our experience draws from over 700 different seating products, at least 1.500 samples delivered and many products installed all over USA since 1990 (when ECLECTIC® launched).

Hundreds of different ECLECTIC® CUSTOM CASE GOODS were created, sample rooms made and actually delivered thousands of pieces to various properties.

ECLECTIC® FURNITURE is always produced with technical skills & knowledge, experience. Great care by the manufacturing team and delivery/installation process is given to each project.

When the project is awarded to us, we will absorb the cost for samples.

ECLECTIC® has the following company next to design, production, and project management and that is ECLECTIC® Advisory.

It is your Peace of mind!

We can help you to initiate your hospitality interior projects, where **ECLECTIC® Advisory** does all the work from budgeting to quality design, so you focus on your core development business and/or service of high level hospitality.

You are completely free to choose ECLECTIC® in the next phases.
